DATE: 24 February 2011

Community Notice

QAL will be conducting tests as part of the commissioning process of a package boiler, over a three week period starting Monday 28th February 2011.

Short periods of high noise levels may be experienced between the hours of 9am and 5pm whilst steam blow throughs are performed to clean debris from the steam header, boiler and superheaters.

The gas fired package boiler is located on the eastern side of the plant and will be used to produce additional steam for the processing of bauxite, particularly during planned maintenance outages of the existing coal fired boilers.

For further information, contact the QAL Community Hotline on 1800 181 110.
