

QUEENSLAND ALUMINA LIMITED

Senior Civil Engineer

Major Earthworks Projects – Gladstone, Qld

We are seeking a Civil Engineer to join our Engineering and Asset Integrity Team at Queensland Alumina Limited. The successful applicant will manage the long term residue disposal strategy for the QAL alumina refinery in Gladstone.

The role includes a mixture of strategy development and project management functions. A high standard of verbal and written communication skill is essential to successfully coordinate the external engineering design works with site construction works and with the internal residue disposal operations team. Key responsibilities include: assisting in planning and monitoring disposal operations, managing the long term strategic plan for ash, mud and waste disposal areas; QAL representative for outsourced civil design works.

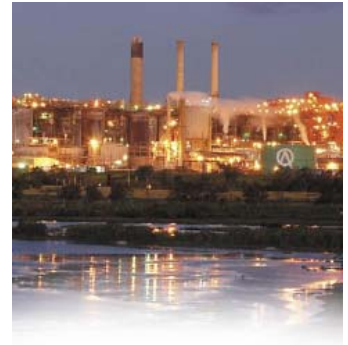

The successful applicant will also have active participation in identifying improvements to ensure safety, environmental, cost and delivery targets are achieved.

Skills required

- Tertiary Qualifications in Civil Engineering or similar. Eligible for CPEng status.
- Demonstrated experience in earthworks construction projects and/or management of tailings and waste water
- Knowledge of design and management requirements pertaining to tailings dams.

Applications

Applications close **Sunday 28 March 2010**. Please forward applications directly to QAL at recruitment@qal.com.au.
